Lovely Professional University

School of Computer Science and Engineering

Course Code: CSE326 - Web Development
Assessment: CA1 Project-Based Assessment
Project Title: EstateFlow - Property Lead Management System

Project Overview:
EstateFlow is a specialized Real Estate Lead Management Web Application built using HTML5, CSS3, and JavaScript. The application enables property consultants and agencies to systematically capture, track, and progress real estate leads across multiple stages of the sales pipeline. Features include an interactive dashboard with real-time analytics, all leads registry with inline stage updates, dynamic sales pipeline board categorized by deal stages, and an integrated follow-up schedule. All data is persisted locally via the browser's LocalStorage API ensuring continuous state retention across sessions.
